Since the last Earthquake in England.	24
Our Kings Maiesties raigne, whome the King of heauen graunt long & prosperously to raigne ouer vs, Amen.	3

*A briefe Declaration and re-  
hearfall of all such things as are compre-  
hended in this present Almanack and  
Prognostication, for this yeere of  
our Lord God 1605.*

**B**riefe obseruations of Husbandry.  
Certaine elections for Physicke and Phlebotomy.  
The government of the 12. signes in mans body.  
The number of the dayes contained in euery month.  
The Dominicall letter and weeke dayes.  
The Foraine Computation.  
The number of the Sundayes after Trinitie and Aduent  
for the ready finding of the same, for the reading of di-  
uine seruice.  
The entering of the Sunne into euery of the 12. signes.  
A note to shew when marriage is not to bee solemnized  
without licence.  
The beginning and ending of euery terme.  
The howre and minute of the change of the Moone, her  
full and quarters.  
A note for all the scattifull dayes of the yeare, both mooue-  
able and fixed, and also of the Ember weekes.  
The signe where the Moone is in euery daye at high  
noone.  
A rule for the beginning and ending of the termes with  
their returnes.  
Of the three great and fearefull Eclipses which shall be  
seene this yeare of our Lord in our Horizon.  
A Description of the foure quarters of this present yeare of  
our Lord God 1605.  
Of the disposition of the weather: with the rising and set-  
ting of the Sunne euery vii. day throughout the yeare  
with Physicall rules in the latter end of euery moneth.  
Certaine

**Certaine profitable rules  
and brieve obseruations concerning  
Husbandrie.**

**T**he best time to sow all kinde of Corne, is when the Moone goeth her course in Cancer.

The best time to Set, Plant, and Graffe, when the Moone is in a fixed signe, especially in Taurus or Aquarius, in the increase of the Moone, which is betwene the change and the full.

To sow Seedes the Moone being well seated in Taurus, Virgo, or Capricornus.

Fell Timber to build withall, when the Moone is well towards the last quarter, she being then in Aquarius or Pisces.

Croppe trees and fell wood to burne, that the stocke may be better and sooner growe againe, when the Moone is in her first quarter.

Remooue and set young Trees, in the last quarter of the Moone, in Taurus or Capricorne, and that in the moneths of September, October, November & February.

The best time to cut your Vines, is in February or March, the Moone increasing in Taurus, Virgo or Libra.

The best time to gelde Cattell, the Moone decreasing, in Aries, Sagittarius, or Capricornus.

The best time to sheare Sheepe, is in the increasing of the Moone, that is from the change to the full.

To cut haye that it may be sooner growe againe, the Moone increasing in Taurus, Virgo, or Libra.

To mucke your land that the weedes may not growe thereby, is in the increasing of the Moone, that is from the full to the change.

Certaine Elections for Phisicke and Phlebotomie  
by the motions of the Moone.

**W**hen the weather is eyther extremely hoate or colde, it is not then convenient, eyther to let blood, or to purge, unlesse some great necessitie doe require it: yet notwithstanding if this blood letting be for the Phreneticke, the Pestilence, the Squinacie, the Plurisie, the Apoplexie, for a continuall headache, proceeding of choller, or blood, or for any hoate burning feuer, or other extreme paine, a man in such a case, may yet take a chosen time, because the patient might miscarrye in the meane season. But in this foresaide case of extremities, blood is not to be let in such a great quantity, as otherwise it would, if a chosen time might conveniently be expected.

The best time to let the Phlegmaticke blood, is when the Moone is in Arie, or Sagittarius, the head and thighes excepted.

For the Melancholly, the Moone being in Libra, or Aquari, the buttockes and legges excepted.

For the Chollericke the Moone being in Cancer, Scorpio or Pilces.

For the Sanguine all be good which before is named.

In the Spring time, let blood at the right side.

In harvest time, let blood at the left side.

To stop Fluxes, Runnes, & Lires, the Moone in V, W, xy.

To take Preparatiues, the Moone in Y, A, Z.

To take vomites, the Moone in A, Y, B.

To take Gargarises the Moone in Y, G, F.

To take Osters, the Moone in A, m.

To enter Bathes for hote diseases, in G, m, H.

To enter Bathes for colde diseases, the Moone in Y, A, Z.

To purge with Purions, when the Moone is in Scorpio.

To purge with Electuaries when the Moone is in Cancer.

To purge with Pilles, when the Moone is Pilces.

# June bath. xxx. dayes.

This month of June vs clarified Whay,  
Boyled with colds hearbes drinke alway.  
From violent exercise now abstaine,  
Except thou wilt in trouble remaine.

# A brieft and necessarie rule to know the beginning and end- ing of euery Terme, with their Returnes.

**Quillarte Terme** beginneth the xxiii. day of Iannuarie (if it be not Sunday) which so being, it is then referred vntill the day following, and endeth the xii. of Februarie. Which terme hath foure returnes. That is to say.

Octabis Hillarij. }	Crastino Purifica:
Quind. Hillarij. }	Octabis Purifica:

**Easter Terme** beginneth xvi. dayes after Easter, and endeth the Sunday next after Ascention daye. And hath five Returnes. That is to say.

Quind. Pasche.	} Menſe Pasche.	} Quinque Pasche.
Tres Pasche.	} Crastin. Ascension.	

**Trinitie Terme** beginneth the Friday next after Trinitie Sundaye, and endeth the Wednesday fortnight after, And hath foure returnes. That is to say.

Crast. Trinitatis. }	} Quind. Trinitatis.
Octab. Trinitatis. }	} Tres Trinitatis.

**Michaelmas Terme** beginneth the ix. day of October (if it be not Sunday, as is aforesaid) and endeth the xxviii. of November. And hath eight Returnes. That is to say.

Octabis Michael. }	} Crast. Animarum.
Quind. Michael. }	} Crast. Martini.
Tres Michael. }	} Octa. Martini.
Menſe Michael. }	} Quind. Martini.

**Note also** that the Exchequer openeth eight dayes before any Terme begin, except Trinitie Terme, in which it openeth but foure dayes before.

Neue. 1605.

## *A Prognostication,*

seruing for the yeere of our  
Lord God and Sauour Iesus  
Christ. 1605.

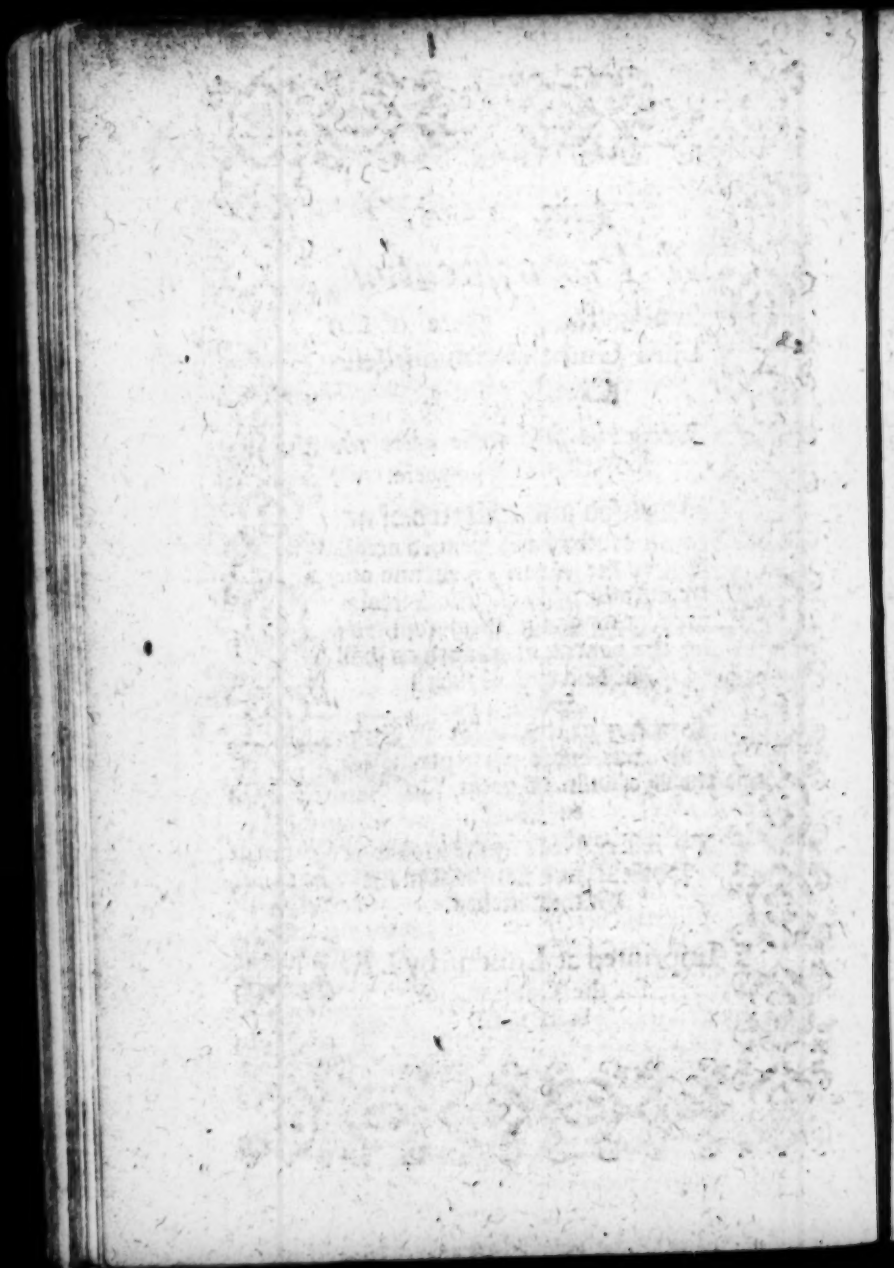

*Being the first yeere after the  
Bissextile or Leape-yeere.*

Practised and collected of na-  
turall causes, and penned accor-  
ding to the learned rules, and ob-  
servations of Ancient Astrolo-  
gers, and Sage Philosophers:  
for the benefit of all such as shall  
be desirous of such a  
worke.

Seruing generally for all Eng-  
land, but moze particularlie for  
the Meridian of great Yarmouth  
in Nozff.

By Ieffery Neue, practitioner of  
Physicke, and Student in the  
Mathematickes.

Imprinted at London by I.R.  
for the Companie of  
Stationers.

✱ Of the Eclipses which shall happen this  
present yeere of our Lord God.

1605.

**T**Here will sensibly & visibly appeare in our Horizon,  
a great Eclipse of the moone vpon the 24 of March  
being Palmesunday, 35 minuts after 7 of the clock at  
night, the being situated at that instant in the 12 cuspis  
of the heavens, in the 2 face of Libra, and Diametrically  
opposite vnto the sun, in a signe of the Aerie triplicitie,  
naturally hote and moist, of complexion Sanguine,  
Masculine of the day, occidentall, & moueable the house  
of Venus, the exaltation of Saturne, and the fall of the  
Sunne: This Lunarie obscuration dooth continue,  
from the beginning to the end three houres, and 24  
minutes, the points or degrees eclipsed, are a 11 & 56  
minutes: The effects of this eclipse, shall both beginne  
and end this yeere. Now in perusing the celestiaall po-  
sition, at the time of the moones greatest depriuation, I  
find the same for to happen in the 12 place, domicilio  
tristium euentum, the house of priuie and secreete ene-  
mies, thought, care, sorrow, sadness, lamentation, ha-  
tred, imprisonments, deceiuers, backbitors, enuious  
persons, &c. Venus Domina loci. Eclipses in the 5 house,  
with Mercurie in that watry signe Pisces, foze-sheweth  
great winds, stormie tempests, and vnerpected pirrils,  
which will be to the damage, hurt, and hinderance of  
Nauigatozs and Sailers, much strife, sedition, & pri-  
uie hatred, among the baser sort of people, vntimelie  
births, disoord and discention, about patrimonies, and  
the inheritance of dead mens goods, much mischief,  
theft, and wickednes, famine, and dangerous sickness-  
es, as hote burning Pestilent Agues, small poxes, and  
measels, inflammations of the liuer, paynes in the back,  
the stone, retention of vrin, fluxes of blood, and Plu-  
ries, many kindes of bites and swellings, paine about  
the midriffe, stomack, & reynes, dangerous fluxes, and  
much corruption of blood, will be this yeere in young  
bodies, whereof diseases very doubtfull will ensue, if

## A Prognostication

the beginning bee not stayed, by the aduise of the learned. Furthermoze, corruption in the fruits of  $\text{¶}$  earth, destruction among foure-footed beasts, strange rumors, with other troublesome calamities, which will especially worke their force and effect, vpon these Countreies, Citties, and townes, which are vnder the first quadrangle and the signe Libra, as are: Bactriana, Thebaida, Trogloditica, Thulcia, Aethiopia, Sabandia, Alsatia, Sundgania, Liuania, Caspia, Austria, Caieta, Landa, Sueffa, Placentia, Argentina, Spira, Vnipina, Heylpruna, Frisinga, Vienna Austris, Lanshuta, Friburgum Brisgoia, Ar-latum, &c. And those persons which in their Radix, or Resolution, haue the degree of the sunne, the moone, the Lord of the ascendent, the Lord of the natiuitie, Medium cæli pars fortunæ, or the fixe Planets, in the 14 grade of Libra, Capricornus, Aries, or Cancer, shal be chiefly obnoxious, to the force and violence thereof. And thus much, or rather thus little, concerning the effects of this Lunarie defect. Beseeching the almighty, of his accustomed goodnes and mercy, to giue vs grace of true repentance, that wee may vnfeignedly, embrace the gladsome tydings of his holy Gospel, & so through his infinite goodnes, and exceeding mercy, wee may be safely protected, and wholly deliuered from all these evils, both of body & soule, now and euermore. Amen.

## Of the Eclipse of the Moone the 17. day of September. 1605.

**T**here shall also appeare and be seene another Eclipse of the Moone, the 17 day of September 1605. about 4. of the clocke in the morning, shee being placed in the first face of Aries, the house of Mars, & the exaltation of the Sun: the time & continuance of this Eclipse, will be 3 howres, & 13 minuts, the degrees or points, which shal be Eclipsed, are 8, and 58 minuts. As concerning the effects, they shall not begine vntill the next yeare, and therefore I will omit them at this time.

## ¶ Of the Eclipse of the Sunne the second of October.

**V**pon the second of October, the bright globe of the Sunne, (which is the fountaine of light, and the chiefe moderatoz of all the rest of the lights, shall be eclipsed or darkned, by the direct interposition of the body of the Moone, betwene him and the earth, about halfe an houre past one of the clocke in the after noone, in the second face of Libra. The time fro the beginning of this Eclipse, vntill the latter end, shall be 2 howres and 24 minuts. The degrees eclipsed, are 11 & 35 minutes. The effects I will deferre to write of, vntill the next yeere, for then they shall begin, and so continue about the space of two yeeres.

The great coniunctions of great starres,  
the Eclipse of Sunne and Moone,  
Doth threat great dearth; great death & wars  
if we repent not soone:  
Now God aboue, and wrath aboue,  
and heauen aboue relent,  
And man beneath, and sinne beneath,  
and earth beneath, repent.

A description of the foure quarters of this yeere  
of our Lord God. 1605.

### *Of Winter.*

Sunne in ♊ ≈ ♋.

**W**inter, according to our vsuall computation, be-  
ginneeth the 11 of December, in the yeere forego-  
ing, at the first entering of the Sunne into the first de-  
C 3, græ,

## A Prognostication.

gree, of the signe Capricornus, at which time the Sun shall be at his greatest South declination, from the equinoctiall line, so that he riseth South-east, and setteth South-west. Now is the Hiemall or Winter Solstice, for the sun is so far remoued from our Zenith or vertical poynnt, that euen now is the shortest day, and the longest night in all the yeere with vs. This season is of nature cold and moist flegmaticke, aunswering to the complexion of old men, and agreeable to the element of water.

Of the Spring. Sun in  $\gamma \delta \Pi$ .

The Spring beginneth the 10. of March, the Sun then entering into the Equinoctiall signe Aries, the day & night being of an equall length, throughout the whole world. This quarter is hote & moist: and that temperatly without extremitie, and therfore accounted the most wholsome time in all the yeere: for now sicknesses and paynes, gotten before, may be best remedied and remoued: and griefes and diseases feared to come, may be best prevented and auoyded.

Of Summer. Sun in  $S \Lambda \mu$ .

Summer beginneth the 11 day of June, when the Sun entereth into Cancer, making the longest day, and the shortest night in the yeere. This season, according to his proper nature is hote and dry, resembling the element of fire, and complexion of chollier.

Of Haruest. Sun in  $\zeta \eta \tau$ .

Autumne, called Haruest quarter, beginneth the 12 day of September, when the Sunne entereth into Libra, making the second Equinoctiall, the day & night being of a most equall length. This quarter is naturally cold and dry, variable, and vnconstant, very dangerous for sicknesses and diseases in some persons, as in those that bee aged, or such as be not perfectly cured of their Summer maladies, &c.

# A Declaration of the inclination and disposition

of the winds and weather, according to the influences & diuers motions of the erraticall and fixed starrs: with the day, howre, and minute of the change of the Moone, her full, and quarters: and also of the rising and setting of the Sun in every month of this yere of our Lord God. 1605.

## ¶ Of Ianuarie.

Day	The sunne riseth.	The sunne setteth.
1	howre 8. and 3. minuts.	howre 3. and 57. min.
7	howre 7. and 56. min.	howre 4. and 4. min.
14	howre 7. and 46. min.	howre 4. and 14. min.
21	howre 7. and 34. min.	howre 4. and 27. min.
28	howre 7. and 23. min.	howre 4. and 37. min.

The last quarter the second day, 23 minuts after 10 of the clocke in the forenoone, windy, apt for snowe or raine, or such like distemperate weather, the 3. 4. and 5. dayes following, zona orionis emergit, turbidus est aer fauonij flatu. The new moone the 9 day, 25 minuts after 7 of the clocke in the morning, and 10. 11. and 12. dayes, winterly weather, Lucida coronæ vesperi occidit, tempestatemque efficit. The first quarter the 17 day, 23 minuts after 3 of the clock in the morning, the 18. 19. and 20 daies cloudy & windy. The full moone the 24 day, 50 minuts after 9 of the clock at night, temperate weather following. The 28. day, Sirius oritur vesperi. The 30 day, Aquila vesperi occidit tempestatemque secundum Prol. efficit. In this month of Ianuary, vse little phisick, except great necessity constraineth. weare warme clothes, and eate warme meates: also to drinke swine fasting, is very good and wholesome.

## Of February.

Day	The sunne riseth.	The sunne setteth.
1	howre 7. and 14. min.	howre 4. and 47. min.
7	howre 7. and 4. minuts	howre 4. and 56. min.
14	howre 6. and 50. min.	howre 5. and 10. min.
21	howre 6. and 34. min.	howre 5. and 26. min.
28	howre 6. and 22. min.	howre 5. and 38. min.

The

## A Prognostication

The first and second dayes windy and wet, the 3 of february, Regulus riseth in the evening, and the 4 day, it setteth in the morning, of the which starre Prol. saith, that when that light and bright star in the breast of the Lion beginneth to set, it procureth northerly windes and sometime raine. The new moone the 7 day, 18 minutes after 10 of the clock at night, Libra ascending, inclined to druing moisture: the 8. 9. and 10 dayes very apt for the like weather with wind. Cauda Delphini Vesperis occidit quando ☉ ingressus est principium ♋: De quo Prol. Delphino occidere incipiente, ventorum cōcursus fit cum niuib. Auster tamen ut plurimū violentior fit cum pluuiā. Cardan: 7. Aph: 94 Delphini vespertino occasu dies hyemant. The first quarter the 15 day, 48 minutes after a 11 of the clock at night, frosty and windie. The 16. 17. 18. 19. and 20 daies disposed to snow or windy moisture. The full moone the 23 day 48 minutes after 9 of the clock in the forenoone, and 24 windy & cloudy, the 25 and 26 frostie, the 27 and 28 stormy weather. In this month of februarie, all thinges that doe opilate, stop, or thicken the blood, are to be refrained: and yet forbear Phisicke and letting of blood, except great necessity doe constrain it, and learned counsell doe advise it. Beware of taking cold, for Agues now are easily gotten. &c.

### ☿ Of March.

Day	The sunne riseth.	The sunne setteth.
1	howre 6. and 20. min.	howre 5. and 40. min.
7	howre 6. and 8. minutes	howre 5. and 52. min.
14	howre 5. and 54. min.	howre 6. and 6. minutes
21	howre 5. and 40. min.	howre 6. and 20. min.
28	howre 5. and 26. min.	howre 6. and 24. min.

The last quarter the 2 day, 20 minutes after one of the clock in the morning, and 3. 4. and 5. dayes reasonable temperate. The 6 day vindemiator oritur vespert. cuius ortu. Prol. Aquilonem gelidum flare scribit. The 8 day stormy.

Stormie. Newe moone the 9 day, 25 minutes after 2 of the clock in the afternoone, cloudy and stormy: the 10 day Arcturus vesperi oritur cui Prole semper tempestates assignat. Cardan inquit: cum Arcturus vesperi exoritur hirundines apparent iainque ver est. Canst thou guide Arcturus with his sonnes. Iob 38, 32. The first quarter the 17 day, 8 minutes after 6 of the clocke at night, and 18, 19. and 20 dayes inclined to shewrs. Full moone the 24 day, 35 minutes after 7 of the clocke at night, the moone shall be eclipsed, the weather temperate for the time. The 25. 26. and 27. dayes some change, the 28 and 29. somewhat better, the 30 day, Scorpius occidit nebulosum est calum. The last quarter the 31 day, 22. minutes after 10 of the clocke in the forenoone.

In this month of March, the humors of mans body begin to increase: & now grosse feeding breedeth grosse blood, and grosse humors: wherefore now (in the milde and warme weather) it is good to purge & clarifie the blood by potions, bathings, and blood letting, or such other waies, as the learned Physitian shal appoint, and as the cause of the disease shal require.

¶ Of Aprill.

Day	The sunne riseth.	The sunne setteth.
1	howre 5. and 18. min.	howre 6. and 43. min.
7	howre 5. and 6. minuts	howre 6. and 34. min.
14	howre 4. and 54. min.	howre 7. and 6. minuts
21	howre 4. and 59. min.	howre 7. and 21. min.
28	howre 4. and 29. min.	hower 7. and 31. min.

The first and 2. dayes sayre, the 3. 4. 5. & 6. dayes some Aprill shewrs. The new moone the 8. day about 7 of the clock in the morning, cloudy: the 9. 10. 11. & 12. dayes temperate & sayre. The first quarter the 16. day, 10. minutes after nine of the clock in the forenoone, seasonable. The 17 day vigilia oriuntur fauonius spirat. who can restrain the sweet influences of the Plyades. Iob, 38, 31. the 18, 19, & 20 dayes very good weather.

The

## A Prognostication

**The 22 day**, lucida lancis Australis mane occidit, imbres mouet. **The full moone the 23 day**, 47 minuts after 3 of the clock in the morning, some moysture: the 24 day in like manner: the 25. 26. 27. and 28. dayes all like to proue seasonable. **The last quarter the 29 day** 35 minuts after 9 of the clock at night, somewhat windie, the 30. daye.

In this month of Aprill, the pores of men are opened, and are apt to receiue phisick: and they that nowe refuse the same, I comit them to the benefit of nature, for of all times of the yere, this is the best to preuent causes of sicknesses, or for speedy remedy in extremities: for now nature herselfe dooth renew strength through all the body. So where sickness happeneth, shee soone vnburdeneth by the meanes of Physicke: wherefoze, what it cannot doe now, hereafter it will hardly bee doone: therfore take time whilst time is. &c.

### ¶ Of May.

Day	The sunne riseth.	The sunne setteth.
1	howre 4. and 23. min.	howre 7. and 38. min.
7	howre 4. and 15. min.	howre 7. and 45. min.
14	howre 4. and 5. minuts	howre 7. and 55. min.
21	howre 3. and 56. min.	howre 8. and 4. minuts
28	howre 3. and 50. min.	howre 8. and 9. minuts

**The first of May** Mars entereth into Gemini, the 2. and 3. dayes apt for shewers, the 4. day Sirius vesperi occidit, conturbatur aer ab Austro, et Aquilo simul permiscetur iuxta Ptolom. **The new moone the 7. day**, 13. minuts after 11. of the clocke at night, in the last face of Taurus, and 8 daye daye. **The 9 day**, Pliades incipiunt occidere vesperi, De quibus Ptol: scribit, quod Austrū ventum commoueant. **The first quarter the 15 day**, 35 minuts after 8 of the clock at night in the earthy triplicitie, and 16. 17. and 18. dayes pleasant weather. **Full moone the 22 day**, 20 minuts after 11 of the clock in the forenoone, for the time daye. **The 23** Aquila vesperi oritur.

oritur. The 24 day, Hyades mane oriuntur. The 25 day Venus entereth into Gemini, the 27. and 28. sayre. The last quarter the 29 day, 48 minuts after 10 of the clock in the forenoone, and 30. and 31. ouercasting cloudes disposed to moysture.

This month of May rise early, for May dooth not loue sluggards. And let such as be in health and able, walke into the fieldes, and eate and drinke a little be- times: And for such as be sick, it is a very good time to take phisicke. Such as be whole, God keepe them in health: and such as be sick, God send them good Phis- utions and phisicke.

## ¶ Of Iune.

Day	The sunne riseth.	The sunne setteth.
1	howre 3. and 49. min.	howre 8. and 11. min.
7	howre 3. and 46. min.	howre 8. and 14. min.
14	howre 3. and 47. min.	howre 8. and 15. min.
21	howre 3. and 49. min.	howre 8. and 13. min.
28	howre 3. and 52. min.	howre 8. and 9. min.

The first and 2. dayes sayre and pleasant, the 3 day Luna in Apog. The new moone the 6. day, 20. minutes after 2. of the clocke in the afternoone, a sayre change, the 5, 6. and 7. the weather vnconstant, the 8. 9. & 10. dayes sayre & temperate. The first quarter the 14. day 43 minuts after 4. of the clock in the morning, and 15 dayes white disperfed cloudes: the 16 & 17 some shew of ouercasting. Arcturus occidit mane et aeris intemperies est. The full moone the 20 day, 7 minutes after 7. of the clock at night, cloudy and vnertaine. The 21. day, Orion exoritur et Fauonius spirat. The 22 day some heate drops, the 23. 24. 25. and 26. dayes, sometime sayre. The last quarter the 28 day a 11. minuts after two of the clocke in the morning, the weather indiffe- rent.

In this month of Iune, if thou must needs vse phi- sicke take it early in the morning, that it may haue wrought

## A Prognostication

Wrought before the heate of the day: and vse a light oz thin dyet, for the stomacke is not now so able to digest as in winter, oz some other of the former months. It is very good and conuenient for some to drinke clarified Whey, boyled with cold hearbes, and to abstaine from ouer violent exercises. &c.

### ¶ Of Iuly.

Day	The sunne riseth.	The sunne setteth.
1	howre 3. and 54. min.	hower 8. and 6. minuts
7	howre 3. and 59. min.	hower 8. and 1. minuts
14	howre 4. and 7. minuts	hower 7. and 54. min.
21	howre 4. and 20. min.	hower 7. and 40. min.
28	hower 4. and 30. min.	hower 7. and 30. min.

**The second of Iuly**, oritur cinguli orionis prima: et criticus est hic dies. Namque si pluuia hoc die ceciderit, fieri saepe solet, vt duret continuas. 4. hebdomadas. **The new moone the 6 day** about 4 of the clocke in the morning, inclined to ouercasting cloudes, the 7. 8. and 9. dayes distemperate. **The first quarter the 13. day** halfe an hower after 10 of the clocke in the forenone, the winde southerly, and some tempestuous weather following about the 15. oz 16. dayes. **The full moone the 20 day**, 56 minuts after 3 of the clocke in the morning, indifferent weather. **The 23 day**, Asellus Boreus vespere occidit. **The 24 and 25. dayes** sultring heat. **The last quarter the 27 day** at 7 of the clocke at night, & the 28. 29. and 30. dayes, like to proue most of their temperate.

**In this month of Iuly**, vse cold hearbes and colde meates, abstaine from phisicke, and extreame exercises: and now the Riuers are moze wholesome then the Bathes.

# Neue. 1605.

## ¶ Of August.

Day	The sunne riseth.	The sunne setteth.
1	howre 4. and 36. min.	howre 7. and 24. min.
7	howre 4. and 48. min.	howre 7. and 13. min.
14	howre 5. and 0. minuts	howre 7. and 0. minuts
21	howre 5. and 16. min.	howre 6. and 44. min.
28	howre 5. and 27. min.	howre 6. and 34. min.

The first of August, Sirius mane oritur. The 3 day, Aquila mane occidit. The new moone the 4 day, 18 minutes after 4 of the clock in the afternoone, very boate. The 8. day, Regulus mane oritur cuius exortu Aquilonem flare Ptol: scribit. The first quarter the 11. day, about 3 of the clocke in the afternoone, somewhat clowdie. The 12. 13. and 14. dayes apt for the time. The full moone the 18 day, 40. minutes after 2. of the clock in the afternoone, and 19. 20. and 21. dayes, sundry stormes. The 22. 23. 24. & 25. somewhat clowdie and windie. The last quarter the 26 day, 56. minutes after high noone: in the apery triplicitie, hote and temperate, about the 29 and 30 dayes, some storme is to be feared.

In August, moderate dyet is good physick, for nowe it is very dangerous to surfet: and take good heede of heates and then colds, for nothing sooner engendereth pluries. And vse not to sleepe much, and especially afternoone, for making Opilations, and for auoyding of Agrewes, and the headach, and Catharres. &c.

## ¶ Of September.

Day	The sunne riseth.	The sunne setteth.
1	howre 5. and 34. min.	hower 6. and 16. min.
7	howre 5. and 46. min.	hower 6. and 14. min.
14	howre 6. and 2. minuts	hower 5. and 58. min.
21	howre 6. and 16. min.	hower 5. and 44. min.
28	howre 6. and 28. min.	hower 5. and 32. min.

The first of September, criticus est hic dies. Vt si hoc die non pluat Autumnus, reliquus siccus sit. The newe moone

## A Prognostication

moone the 3 day, 17 minuts after 3 of the clocke in the morning, cloudy and windy, about the 6 and 7 dayes some stormes of raine. The first quarter the 9 day, 22. minutes after 8 of the clock at night, very fayre: the 10 and 11 windy. The 12. day Arcturus oritur. Peril. Arcturo exorientē imbres cadunt. The full moone the 17 day eclipsed, about 4. of the clocke in the morning, cloudy & windie. Corona ortu matutino euehitur, venti commutantur, asperaque in mari fit hyems. The last quarter the 25 day, at 7. of the clocke in the morning, inclined to wind and raine: the 26 and 27. not unlike the former, the 27. 28. 29. and 30. dayes, most of the vnconstant.

In September, such as haue neede of phisicke, may safely take it, and also may bathe and bleede. And now such fruites as are ripe, and not infected, are good to eate for such as haue good stomacks. &c.

### ¶ Of October:

Day	The sunne riseth.	The sunne setteth.
1	howre 6. and 34. min.	hower 5. and 26. min.
7	howre 6. and 46. min.	hower 5. and 14. min.
14	howre 7. and 0. minuts	hower 4. and 0. min.
21	howre 7. and 15. min.	hower 4. and 45. min.
28	howre 7. and 26. min.	hower 4. and 34. min.

The new moone the 2. day, halfe an howre after one of the clock in the afternoone, windy: the 3. 4. 5. and 6. dayes windy and stormy. The first quarter the 9 day, at 4. of the clock in the morning, cloudy and windie: the weather variable and vnconstant about the 12. 13. and 14. dayes. The full moone the 16 day, 9. minutes after 8 of the clock at night, cloudy, inclined to wind, Cæli enarrant gloriam Dei, et firmamentum annunciat opera manuū eius. The last quarter the 25 day, 24. minutes after midnight, fayre for the time. The 26 day, orionis pes sinister mane occidit et interdum magnas plu-  
ias affert. Canst thou lose þ bands of Orion. Iob. 38. 31.

The

The new moone the 31. day, 18. minutes after 11. of the clock at night, some fall of moisture.

In this month of October, vse hote meates and drincke to nourish good blood: and beware of taking cold, because the quartaine Ague will be apt for to bee taken, and such other dangerous diseases.

¶ Of Nouember.

Day	The sunne riseth.	The sunne setteth.
1	hower 7. and 33. min.	hower 4. and 27. min.
7	hower 7. and 42. min.	hower 4. and 18. min.
14	hower 7. and 52. min.	hower 4. and 8. min.
21	hower 8. and 3. minutes	hower 3. and 57. min.
28	hower 8. and 9. min.	hower 3. and 50. min.

The first and second dayes some raine, the 3. and 4. temperate, the 5. and 6. some southerly wind, inclined to be vnconstant. The first quarter the 7. day at 3. of the clock in the afternoone, frostie: the 8. and 9. variable. The 10. day Plyades mane occidunt. The full moone the 15 day, halfe an hower after two of the clock in the afternoone, fayre and frostie, the 16 some oner-casting, the 17. 18. and 19. dayes likelihood of snowe or sleete. The last quarter the 23 day, at 4 of 5 clocke in the afternoone, good and seasonable. The 24. day, Arcturus occidit Heliace, et plerūque facit imbres Card. The 25. and 26. temperate, the 27. 28. and 29. bent to moisture. The new moone the 30 day, 16. minutes after 9. of the clocke in the forenoone, a cold and sharpe windy change.

In Nouember finish the phisicke that yee meane to take, and so rest till March, except some great necessity compell the. Vse good meates and wholesome wine to nourish thy blood: and provide thee warme clothing, and goe dry of thy feete, or else make sure account of rume and pose, besides some other inconueniences that will ensue, &c.

¶ Of

## A Prognostication

¶ Of December.

Day	The sunne riseth,	The sunne setteth,
1	howre 8. and 12. min.	howre 3. and 18. min.
7	howre 8. and 14. min.	howre 3. and 46. min.
14	howre 8. and 15. min.	howre 3. and 45. min.
21	howre 8. and 12. min.	howre 3. and 48. min.
28	howre 8. and 7. min.	howre 3. and 53. min.

The first, 2. 3. and 4. dayes sharp, cold, and frostie, the 5. and 6. dayes clowdie and apt for snow or raine: The first quarter the 7. day, about or nere 6. of the clock in the morning, windy and vnconstant. *Magnum mirabile cælum.* The full moone the 15. day, 44. minutes after 9. of the clock in the morning, and 16. stormie and windy. *Acturus vesperi occidit cum 4. grad. vsq. ante cuius occasum venti Austrini flant Cardano.* The 17. day Saturne entereth into Capricornus, and 18 and 19 dayes frostie, the 20. and 21. clowdy, the 22. day windy. The last quarter the 23. day, 56. minutes after 4. of the clocke in the morning, and 24. watpe windy frostie, the 25. 26. and 27. apt for change of weather, the 28. day. The new moone the 29. day, 50. minutes after 7. of the clock at night, clowdie and like to snow, the 30. and 31. in like manner.

In this month of December, abstaine fro phisicke and let thy Kitchen be thy Apothecarie, warme cloathing thy Hurle, merry company thy keepers, and good hospitalitie thine exercise. &c.

FINIS.

*Soli sapienti Deo, sola gloria.*
